EDUCATION

University of Benin (UNIBEN) | Bachelor of Engineering in Computer Engineering | 2021–2026

EXPERIENCE

Frontend Developer Intern | Myartelab | November 2025 – April 2026

- Developed responsive interfaces with HTML, CSS, JavaScript, and React, translating design requirements into usable web experiences.
- Partnered with a UI/UX designer to implement visual layouts across screen sizes, maintaining consistency between design and the browser.
- Built reusable React UI components and organized frontend code to support consistent patterns and efficient iteration.
- Collaborated with team members to deliver features, troubleshoot interface issues, and refine user flows.
- Used Git and GitHub for source control and collaborative development.

PROJECTS

Forme Living — Modern Living / Property Web Experience

Technology stack: to be confirmed

- Developed a brand-focused web experience for Forme Living, presenting its living-space offering through a refined, contemporary interface. Focused on clear content hierarchy, polished visual presentation, and responsive page layouts to help visitors explore the brand and its offering across desktop and mobile.

DevTrack — Job Application Tracker

React, MongoDB, Tailwind CSS | Live Project

- Built a full-stack job-search management tool with authenticated user access and end-to-end application records. Implemented create, view, update, and delete workflows; application-status tracking; dashboard summaries; and search/filter controls so users can organize opportunities and monitor their progress in one place.

TableFlow — Restaurant Reservation Platform

React, Node.js, Express, MongoDB | Live Project

- Developed a restaurant discovery and table-booking experience that brings restaurant information, interactive menus, and reservations into one platform. Integrated authentication including Google Sign-In, connected the React interface to backend services, and created responsive screens with a polished, premium visual style.

CampusConnect — Student Community & Resources Platform

Next.js, NestJS, PostgreSQL | Live Project

- Built a full-stack campus platform designed to help students connect and find campus resources. Developed responsive Next.js interfaces, RESTful API functionality in NestJS, and PostgreSQL-backed data workflows to support the application's frontend and backend.

Artsy — E-commerce Platform

Next.js, JavaScript, Tailwind CSS | Live Project

- Created a responsive storefront with product discovery and product detail experiences, plus shopping-cart interactions for selecting and managing items. Structured the UI with reusable components and styled the pages with Tailwind CSS to provide a consistent shopping experience across screen sizes.

Myartelab — Responsive Landing Page

HTML, CSS, JavaScript | Live Project

- Implemented a complete landing-page layout with structured content sections and interactive JavaScript elements. Adapted the design for mobile, tablet, and desktop breakpoints, prioritizing readable content, responsive composition, and straightforward navigation.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript
Frontend: React, Next.js, Tailwind CSS, Responsive Web Design, REST API Integration, Component-Based Architecture, Form Handling & Validation
Backend: Node.js, Express.js, NestJS, RESTful API Development, Authentication & Authorization, CRUD Operations
Databases: MongoDB, PostgreSQL, Database Modeling
Tools & Deployment: Git, GitHub, Postman, Vercel, Visual Studio Code, API Testing, Debugging, Environment Variables
Professional: Problem Solving, Communication, Team Collaboration, Fast Learning, Attention to Detail
